

Mmmm!

Imagine a whole bar of chocolate to share  
equally, just between me and you.

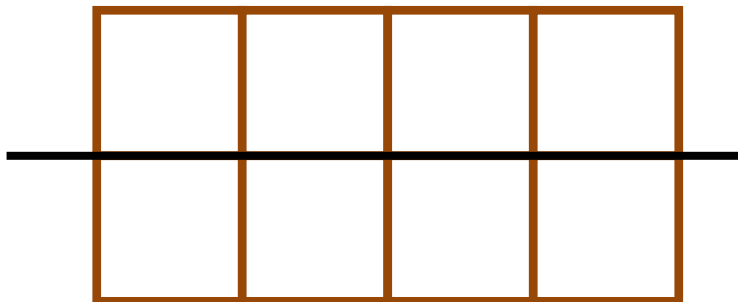

How many ways can you cut it in half?

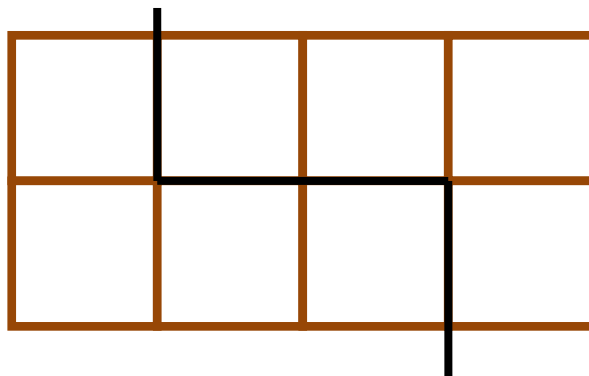

The bar of chocolate has 8 pieces, made up of two rows of four.

Here is one way of cutting it in half:

Here is another way of cutting it in half:

Find as many ways as you can of cutting the bar in half.

Draw your cut lines on the bars below.
